Hi [REDACTED]

Thanks for sending through your email.

I can confirm that the eSafety Commissioner has not provided any direction or advice to Australian ISPs in regard to the blocking of websites hosting footage of the Christchurch terrorist attacks.

We have recently published a statement regarding the eSafety Commissioner's role in respect of the footage from the attacks, which can be accessed here: <https://esafety.gov.au/about-the-office/newsroom/media-releases/statement-christchurch-terrorist-attack>

Cheers

Hi,

Thanks for the chat just now. Keen to get the statement when prepared.

Keen to understand how eSafety may have been involved with issuing advice etc to the telcos.

Cheers,

[REDACTED]
