**Subject:** FW: Domain/URL List [SEC-UNCLASSIFIED] [DLM=For Official Use Only]

## For-Official-Use-Only

[REDACTED] – For your visibility. There were 43 URLs that [REDACTED] provided to the major Australian ISPs which they then used as a basis for voluntarily blocking the domains associated with the URLs [REDACTED]

[REDACTED] What our CyberReport team has been doing is periodically checking all the links to make sure there is visibility as to which URLs are still hosting the Christchurch content [REDACTED]

[REDACTED] This is the latest check we have done. There is still work that needs to happen around the legislative instrument.

[REDACTED]

Let us know if you need anything further. [REDACTED]

Julie
