

# Being online should be fun for everyone!

A Virtual Classroom webinar for Year 3 and 4 students

## Teacher notes

These notes support eSafety's Virtual Classroom webinar, **'Be an eSafe kid: Being online should be fun for everyone'**. The webinar is designed to help students in Year 3 and 4 explore online friendships and cyberbullying through relatable school scenarios. Students will learn how to check in with a friend and show kindness, respect and empathy to build more positive peer relationships online.

### About the webinar

As part of an integrated online safety program, this webinar can be used to check knowledge and support conversations with students and their families. It aligns with the Australian Curriculum in the key learning areas of Digital Technologies, Health and Physical Education, Humanities and Social Sciences and English.

### Preparing for the webinar

If you would like students to answer the questions on the student worksheet, you can print copies or organise access to an editable PDF on a device.

### Joining the webinar

Join the webinar through the link sent in your registration email. Please log on at least 10 minutes before the session. You will be asked how many students will be attending in your learning space. It is preferable for each learning space to have its own registration.

The webinar will run for approximately 45 minutes.

### Students can participate by:

- listening to the presenter
- recording answers to the questions on the worksheet (optional)
- responding to the teacher-facilitated discussions (use the webinar chat box to record and share the students' answers)
- taking their worksheets home and sharing their learning with their parents and carers.

# More resources

## Related classroom resources

eSafety has a range of [classroom resources](#) to support age-appropriate learning and discussions about contributing to safe and positive online spaces.

- [Online safety classroom agreement](#) is a resource to help you co-create an agreement with your students that explains and encourages safe and respectful online behaviours.
- [eSafetykids](#) is a resource designed to help kids navigate a variety of online issues.
- [Cybersmart Challenge](#) has teacher-led activities using animated videos to introduce primary school students to key online safety issues, including cyberbullying, protecting personal information and sharing images.
- [Mighty Heroes](#) is a suite of resources including four short, animated video chapters and supporting educator notes.

## Information for parents and carers

eSafety's live parent [webinars](#) give parents and carers the latest information about online issues and trends and provide strategies to support their children to have safe online experiences. Please let your community know about these opportunities.
