| Subject | AI Chat rooms and young people |
| Details | <p>Hi, I work in s 47E(d), s 47F</p> <p>We have had first hand reports at multiple High Schools the use of young people using AI games to have sexual conversations with AI. These students have stated they are addicted to these websites and are using them for 4-5+ hours a day. From what it sounds like they can choose a character and then chat with another AI character. Students as young as Year 7 have reported using these websites.</p> <p>We are hoping to get some feedback and education about how we can best navigate these disclosures to provide better education to young people about the risks involved?</p> <p>Thank you</p> |
