*Note:*

- As noted on page 190 of the [ACMA and eSafety Annual Report 2024-25](#), to improve clarity and consistency, eSafety has updated its terminology. What we previously described as ‘informal requests’ are now called ‘complaint notifications’. This change avoids confusion and makes it clear that these notifications do not direct platforms to act, but instead informs them about potentially harmful content on their services.
- Complaint notifications do not include service provider notifications given under section 93 of the Online Safety Act 2021 (Cth).
- “Other government department or staff” is based upon complainants who have provided an Australian Commonwealth, state or territory government email address with their complaint.
